# **MC8-20000 SPECIFICATIONS**

The MC8 is a high-capacity, six-axis transducer designed to quantify loads up to 30,000 pounds. The instrument has eight inch square top and bottom plates manufactured from high strength 17-4 stainless steel. The center anodized aluminum shell is notched to allow 5/8" diameter bolts to pass through the 3/4-10 threaded mounting holes. This provides additional mounting possibilities. Elastomeric 0-ring seals protect the strain gages and wiring. Conformal coating of the strain gages further insures long life and consistent, reliable performance.
